

# DHI-ARD910-W

## Wireless Flood Detector

### Features

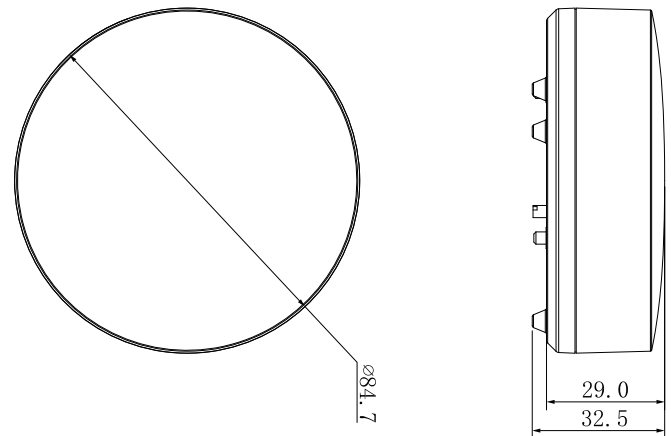

- Contact flood detection technology, quickly detect occurrence of flood or water leakage
- Adjustable probe design, with different sensitivity of detection
- High performance RF communication module, with strong stability of communication
- IP66 waterproof
- Super low power consumption, duration up to 24 months
- Installation available in all-in-one and split suitable for different installation environments.
- Help protect your home from potential water damage. Use near sump pumps, plumbing, refrigerators, laundry rooms, dishwashers, washing machines, sinks, water heaters, toilets, garages, and basements.

### Technical Specification

Name	Wireless Flood Detector
Detection Method	Contact flood detection
Water Level Monitoring Range	0.4mm~3.2mm
Alarm	LED flashes and built-in buzzer
Carrier Frequency	433/868/915MHz
Transmitting Power	10dBm
Transmission Distance	150 meters(open area)
Waterproof Level	IP66
Battery Life	2 years
Work Temperature and Humidity	-10 C~55 C, <95%
Installation	Ground or wall mount
Dimensions	85×85 × 29mm (L×W×T)
Weight	0.25kg

### Dimensions

units: mm
